To Whom It May Concern,

Letter of Support – Geoffrey Bay/Olympus Crescent Coastcare – Ongoing Ecological Restoration Activities

On behalf of Townsville City Council I am pleased to support the Geoffrey Bay/Olympus Crescent Coastcare – Ongoing Ecological Restoration Activities Project.

The project will continue to improve the environmental condition of the area by focusing on two strategies. These strategies are; to control the spread of invasive weeds, and to revegetate the area with appropriate, locally sourced plants.

The natural areas of Geoffrey Bay, Alma Bay and Olympus Crescent are places of environmental, cultural and economic importance to the city and a valuable community asset, which council's Integrated Sustainability Services department would like to see managed for ecological restoration into the future.

Townsville City Council's Integrated Sustainability Services supports the ongoing development of a project to be delivered in alignment with the Queensland Coastal Management Plan and Townsville City Plan, to assist in ecologically restoring and enhancing these areas for the whole of community.

Please ensure all ongoing activities and plans are provided to Adam King for review (adam.king@townsville.qld.gov.au) prior to implementation.

Yours Sincerely

Andrew Hannay
Environmental Management and Natural Resource Management Coordinator
